

Section: Reading 2

Passage:

Renewable energy sources such as solar and wind power have seen massive adoption over the past decade. Technological advances have reduced costs while increasing the efficiency of energy capture. Governments worldwide have also introduced incentives to accelerate the transition away from fossil fuels.

1. What has primarily driven the recent growth in renewable energy adoption?

- A. Rising fossil fuel subsidies
- B. Technological improvements and cost reductions
- C. A decrease in global energy demand
- D. Mandated factory closures

Answer: B

2. What role have governments played in this transition?

- A. Banning electric transport
- B. Reducing environmental regulations
- C. Offering financial and policy incentives
- D. Increasing tariffs on solar components

Answer: C

3. According to the text, what happened to energy capture efficiency?

- A. It declined due to weather instability
- B. It remained largely unchanged
- C. It increased thanks to new technologies
- D. It became too expensive to measure

Answer: C

4. Which two sources of renewable energy are explicitly named?

- A. Geothermal and biomass
- B. Nuclear and hydroelectric
- C. Solar and wind
- D. Coal and natural gas

Answer: C

5. What is the overarching purpose of government incentives mentioned?

- A. To encourage fossil fuel exploration
- B. To accelerate the transition away from fossil fuels
- C. To subsidize traditional power stations
- D. To lower industrial tax rates

Answer: B

6. What is the general tone of the passage regarding renewable energy?

- A. Skeptical and alarmed
- B. Informative and positive
- C. Indifferent and neutral
- D. Highly critical

Answer: B
